Relax, it's just a lamp

ABOUT TONONE

How can we apply our fascination for traditional mechanics and craft tools into state-of-the-art design? This quest was the starting point for the products of lighting label Tonone, known for the use of characteristic construction tools as a visual and a functional basis for innovative product design.

This vision was well illustrated by the design of the Tonone-line up: the Bolt-series, rapidly followed by the sturdy lamp Mr. Tubes, the hand blown glass series Atlas and Ella and the smart serie Orbit. In 2019 Tonone introduces two LED series; Beads, a series of lamps with 360 degrees dimmable LED range and the New Mr. Tubes LED. [- read more >](#)

THE COLLECTION

BOLT Chandelier

The Tonone Bolt Chandelier 6 arm is a contemporary chandelier by designer Anton de Groof. This impressive chandelier is characterised by its six adjustable powder-coated steel arms and powder-coated aluminium lampshades.

BOLT

The sturdy industrial lamp series BOLT is recognisable by functionality in shape, clean lines, and the iconic leading role of the wingnut. The Bolt series is available in 29 models and 10 colors.

BEADS

Thanks to its minimalist design, the Beads series has a modern, bold appearance, it excels when it comes to functionality. The lightweight Beads is made of black powder-coated aluminium and is equipped with a high-quality integrated LED light source.

THE COLLECTION

MR. TUBES Chandelier

Mr. Tubes LED combines pure functionality with a graphic aesthetic. The powder-coated aluminium construction contains 5 LED tubes. The LED tube developed by Tonone provides a 360-degree uniform light thanks to more than a thousand LEDs per meter.

MR. TUBES Connect

The Mr. Tubes Connect is characterised by its adjustable LED tubes. Plan your own Connect design with us.

Mr. Tubes LED is dimmable and available in 2 LED colours; the warmer 2700K and the cooler 4000K.

MR. TUBES Double

The powder-coated aluminium construction contains two LED tubes, giving the Double an industrial look. The Mr. Tubes LED can be hung from the ceiling at any height thanks to the black adjustable steel cables. Available in 2 colours: Smokey Black and Pure White.

THE COLLECTION

ORBIT

Tonone often finds inspiration for its lamps in old or existing mechanical techniques. For the creation of Orbit, the design team looked at the techniques used in the world of sailing. Just like the rigging of a sailboat that holds the mast in place, the Orbit lamps stands firm, supported by three tensioned cables.

ATLAS

The combination of an aluminium or brass hinge mechanism with a transparent hand-blown glass shade creates a constructive lamp with a poetic character. By unfolding the hinge mechanism to an upright position, the glass shade is hold up while it rests on the construction.

ELLA

The hand-blown glass shade by Ella sits on a robust steel base, which emphasises the strong, graphic, yet elegant, and light appearance of the lamp. Both the transparent and neutral grey tones of the glass provide a soft glow and blend harmoniously with the black or white base and brass details.

ANTON
DE
GROOF

MEET THE DESIGNER

Anton de Groof was born in 1967 in Nuenen. With a father who worked as a technical production manager and designer of fencing, his parental home was littered with cardboard mechanisms. A fertile soil for De Groof's fascination with traditional mechanics and old tools.

Anton started the furniture brand Masimo in 1993 with a friend. Ten years later he continues on alone. First with the design of tables and chairs, later with interior and lighting. For example, he sets up 130 stores for a successful clothing brand. For the chain's head office, he designs a lamp as well as the interior.
